

Mathematics Task Centre

TASK CATALOGUE

Tasks in this catalogue have been developed and refined in hundreds of classrooms through the 40+ year history of the Task Centre concept. In this context a task means a card introducing an investigation and accompanied by hands-on materials chosen to encourage entry to, and exploration of, the challenge. They are designed to be used in pairs and are an invitation to 'have a go' at learning to work like a mathematician.

School Year Codes

- A: Junior Primary, Years 2-4
- B: Upper Primary, Years 4-7
- C: Lower Secondary, Years 6-8
- D: Middle Secondary, Years 8-10

Content Codes

- A = Algebra
- L = Logic
- N = Number
- S = Space
- C = Chance & Data
- M = Measurement
- P = Pattern

These classifications are based on the collective opinion of many teachers.
Tasks are open-ended and adaptable to several year levels.
This feature is one criteria of a good task.
